want to get substring from 40th to 91st character.**

Thanks in advance. A: Use `std::string::findString` `stdString` `afterpos`, `afterpos + len`; `stdString` `end` = `afterpos`; This will give you first substring of length `len` starting after `pos` th character. Q: What is the meaning of the hat next to questions? Possible Duplicates: What's the ♦ next to the username, asking, or voting buttons mean? Are those little blue dots next to the questions, answers, etc. normal, or a bug? What is the meaning of the hat next to the left side of the title/question? A: That is a: screenshot Which indicates that you captured a screenshot of the question. Q: How to create a program to turn off monitor in C?
